Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

- 1. (*Currently amended*): A method for prophylaxis or treatment of benign prostatic hypertrophy hyperplasia (BPH) comprising administering an a therapeutically effective amount of lonidamine or a lonidamine analog to a human subject in need of such treatment.
- 2. (Currently amended) The method of claim 1 comprising administering lonidamine to the subject at a dose of 150 mg administered orally once per day for one month.
- 3. (Original): The method of claim 1 wherein the subject is not being treated for cancer.
- 4. (Currently amended): The method of claim 3 wherein the subject is not diagnosed with as having cancer.
- 5. (Currently amended): The method of claim 1 wherein the subject has a serum PSA greater than about 2 ng/ml.
- 6. (Currently amended): The method of claim 5 wherein the subject has a serum PSA less than about 10 ng/ml.
- 7. (*Currently amended*): The method of claim 1 wherein the lonidamine or lonidamine analog is administered in combination with another treatment for BPH.
- 8. (Original): The method of claim 7 wherein the other treatment is: a) administration of an alpha-blocker; b) administration of a 5-alpha-reductase inhibitor; c) administration of zinc; or d) a surgical procedure.
- 9. (Currently amended): The method of claim <u>1</u> 2, wherein lonidamine is administered at least once per week for at least 4 weeks.

- 10. (Currently amended): The method of claim $\underline{1}$ 2, wherein lonidamine is administered at least once daily for at least five days.
- 11. (Currently amended): The method of claim 9 wherein the daily dose is in the range of about 1 mg and about to 300 mg.
- 12. (Currently amended): The method of claim 9 wherein the daily dose is between about 300 mg and about 5 grams.
- 13. (Original): The method of claim 9 wherein the daily dose is 150 mg p.o. TID.
- 14. (*Currently amended*): The method of claim 1, wherein lonidamine is administered as a unit dose oral pharmaceutical composition that is a sustained-release formulation comprising from about 1 mg to about 2000 mg lonidamine.
- 15. (Original): The method of claim 1 wherein, when compared to a baseline prior to the initiation of treatment, the subject's a) AUASI or IPSS score is decreased by at least 3 points; b) prostate size has decreased by at least about 20%; and/or c) serum PSA levels have decreased by at least about 20%, when determined on or after 60 days after the initiation of treatment.
- 16. (Currently amended): A method for treating BPH comprising (a) diagnosing BPH in a patient, (b) administering lonidamine or a lonidamine analog to the patient and (c) determining whether one or more manifestations of BPH are reduced in said patient.
- 17. (*Currently amended*): A method for treating BPH comprising (a) administering lonidamine or a lonidamine analog to a patient diagnosed with BPH and (b) determining whether one or more manifestations of BPH are reduced in said patient.
- 18 20 (Cancelled)
- 21. (New): The method of claim 11 wherein the daily dose is in the range of 5 mg to 70 mg.
- 22. (New): The method of claim 10 wherein the daily dose is in the range of 1 mg to 300 mg.

- 23. (New): The method of claim 22 wherein the daily dose is in the range of 5 mg to 70 mg.
- 24. (*New*): A method for reducing a symptom associated with BPH comprising administering lonidamine to a human subject in need of such treatment, wherein the subject is not under treatment for cancer or diagnosed with cancer.
- 25. (New): The method of claim 24, wherein lonidamine is administered at least once daily for at least five days.
- 26. (New): The method of claim 25 wherein the daily dose is in the range of 1 mg to 300 mg.
- 27. (New): The method of claim 26 wherein the daily dose is in the range of 5 mg to 70 mg.
